

REGISTER #25 STAGE: UNDER REVIEW CONFIDENCE: MEDIUM REVIEW: JUL 30, 2026 AS OF JUL 24, 2026

Commit to the anchor account's five roadmap asks to win the expansion?

DECISION OWNER SALES LEAD	APPROVER FOUNDER	ESCALATION FOUNDER	CATEGORY THE STRATEGIC CUSTOMER'S ASKS
------------------------------	---------------------	-----------------------	--

WHAT THE RECORD SHOWS — EVERY CLAIM CITED OR MARKED

The deal review (Jul 20) calls the asks 'mostly on the roadmap.'

"The five asks are mostly on the roadmap."

m07-015 · DEAL REVIEW NOTES · JUL 20

The register says: two are.

"Two of five asks scheduled (Q4). Two never sized. One declined (register #8)."

register scan · REGISTER CHECK · JUL 20

One was explicitly declined in February (register #8) — it conflicts with the multi-tenant architecture, reason recorded.

"Declined: single-tenant data residency conflicts with the multi-tenant architecture. Reason recorded."

register #8 · DECISION RECORD · FEB 11

Two have never been sized.

"Descoping usage-based billing and audit exports from September. Both move to the October train."

m06-021 · ENGINEERING LEAD · #PLATFORM · JUN 20

And one is a feature engineering moved out of the September launch on June 20 — committing it reopens that decision.

CONTRADICTION ON THE RECORD

"The five asks are mostly on the roadmap." DEAL REVIEW · JUL 20	"Two are. Two were never sized. One was declined in February, reason recorded." REGISTER · FEB-JUL
The room's memory and the record disagree about the same five asks.	

WHAT HAPPENED LAST TIME

— This account's March discount (register #9) was granted as one-time.

— The pattern in the record: this account's exceptions become precedents.

"March: 22%, granted one-time. The April and June requests each cite the prior exception. This account's exceptions become precedents — the pattern is in the record."

REGISTER #9 · PATTERN NOTE

WHAT'S MISSING

— No support model sized for an account four times larger than the current largest.

— No walk-away line anywhere in the thread.

RECOMMENDATION

The February 'no' is the real decision in the room. Reverse it with the architecture cost stated, or the answer to the headline ask is already no — and the deal should be shaped around the other four.

No corrections recorded on this entry. When one is made, it is an attributed, timestamped event in an append-only record — never a silent edit.

How to read this brief: every claim above traces to a quoted source message (message ID · role · channel · date), to a register entry, or is explicitly marked as inference or detected absence. Nothing is smoothed over. This document is illustrative — one shared fictional company, people shown as roles — and contains no customer data. In a pilot, this brief is built from your own exported conversations.
